TAHC Chronic Wasting Disease Requirements for Hunting Exotic Susceptible Species in Texas

AUSTIN, TX – The Texas Animal Health Commission (TAHC) reminds Texans of statewide exotic chronic wasting disease (CWD) susceptible species requirements for the 2022-23 hunting season.

Exotic susceptible species include North American elk or wapiti, black tailed deer, red deer, reindeer and caribou, sika deer, moose, muntjac deer and/or any associated subspecies and hybrids. Axis deer are not classified as a susceptible species.

TAHC and Texas Parks and Wildlife Department (TPWD) general surveillance and movement requirements for susceptible species are in place to help protect Texas cervids from CWD. It is important to stay up-to-date on both agency's regulations for surveillance, movement reporting, identification and record keeping for harvested, captured or bred exotic susceptible species.

Hunters Harvesting Exotic CWD Susceptible Species

Prior to harvesting, hunters should be aware of [CWD Containment and Surveillance Zone](#) locations in Texas. Within these zones, all exotic CWD susceptible species that are hunter harvested shall be tested for CWD. In addition, no part of a CWD susceptible species carcass may be removed from the property unless additional [carcass requirements](#) are met. No carcass may be moved from a zone unless accompanied by a TPWD-issued-check-station receipt, which is required during the operation of the mandatory [TPWD check stations](#). As an alternative to the TPWD check stations, you may contact a [TAHC Certified CWD Post Mortem Sample Collector](#).

Properties where Exotic CWD Susceptible Species are Hunter Harvested

Every calendar year, landowners must have all eligible mortalities CWD tested until valid test results are obtained from three tested animals. An eligible mortality is a death from any cause of an exotic CWD susceptible species that is 16 months of age or older. This includes hunter harvesting, herd culling, natural mortalities on the premises, and animals moved directly to slaughter. The owner of the premises shall ensure that the CWD samples are properly collected and submitted for testing. The owner must also report to the TAHC within 30 days of receiving the valid test results by writing to the Texas Animal Health Commission, CWD Susceptible Species Reporting, P.O. Box 12966, Austin, Texas 78711-2966; by fax to (512) 719-0729; or by email to CWD_reports@tahc.texas.gov.

The owners of high, low, or no fenced properties where exotic CWD susceptible species, at least 16 months of age, are harvested must submit a mortality record to the TAHC each calendar year. [Mortality record forms](#) are due to the TAHC on or before April 1 of each year, and shall be retained for one year from the date of submission.

Owners Moving or Transporting Live Exotic CWD Susceptible Species

The movement of live exotic CWD susceptible species to or from a premises, requires an owner to obtain a Premises Identification Number (PIN) or Location Identification Number (LID) from the TAHC or United States Department of Agriculture (USDA). All live exotic CWD susceptible species moved or transported within the state must have official identification (ID). For more information on PINs, LIDs, and official ID, contact the TAHC Animal Disease Traceability (ADT) Department at 512-719-0733.

An owner of a premises where exotic CWD susceptible species are located within a high fence shall keep herd records that include an [annual inventory](#) and [mortality records](#) for all exotic CWD susceptible species. The inventory shall be reconciled and submitted to the TAHC on or before April 1 of each year. Annual inventory records shall be retained for one year following submission.

A complete movement record for all live exotic CWD susceptible species moved onto or off of a premises shall be submitted to the TAHC. The person moving the exotic CWD susceptible species must have documentation with the exotic CWD susceptible species being moved. This record shall be submitted within 48 hours of the movement and be directed to the TAHC by writing the Texas Animal Health Commission, CWD Susceptible Species Reporting, P.O. Box 12966, Austin, Texas 78711-2966; by fax to (512)-719-0729; or by email to CWD_reports@tahc.texas.gov.

Dealer Record Keeping Requirements for Exotic CWD Susceptible Species

A dealer shall maintain records for all exotic CWD susceptible species transported within the state or where there is a transfer of ownership, and provide these to a TAHC representative upon request. Records required to be kept under [§40.5\(h\)\(1-7\)](#) shall be maintained for not less than five years.

###

The Texas Animal Health Commission (TAHC) was established in 1893 as the Livestock Sanitary Commission and charged with protecting the state's domestic animals "from all contagious or infectious diseases of a malignant character." TAHC remains true to this charge while evolving with the times to protect the health and marketability of all Texas livestock and poultry. Learn more about the TAHC by visiting www.tahc.texas.gov.
